

Estimating The Costs of Conferences

We have done a rough estimate of a cost per person to attend a leading information security conference in Washington D.C.

Cost of Hotels For 4 Days: \$1,000

Flight Ticket from CVG To Washington D.C. \$700

Conference Registration: \$2,375

Food Costs: \$400

Cost Per Person: \$4,475

Team of 3: 13,425

These are just estimated costs based on a few google searches. Actual costs can vary.

Now obviously, there are benefits to attending a live conference. However, when training costs become very high, it can reduce the amount of opportunities that a team can participate in.
